Konstantin Burkin

SUMMARY: Data Scientist in the largest online retail business. 3+ years of production experience. Computer Science PhD and alumnus of Lomonosov Moscow State University.

WORK EXPERIENCE

Senior Data Scientist/ML Engineer

June 2024 – Present • samokat.tech

- <u>Project</u>: Courier shifts optimization
- Stack: Python, Polars, DuckDB, CatBoost, Pyomo
 - o Optimized courier shifts with money-loss model and linear constraints, reducing monthly losses by ₱ millions.
- Project: Forecasting demand for parcel shipping
- Stack: Polars, DuckDB, SQL, S3, Greenplum, GitLab, Poetry
 - o Deployed modules on server with full data engineering pipeline, model fitting and prediction
 - o Automated model retraining and inference with scheduled runs reducing employee labor time by 5%.

Middle Data Scientist

Aug 2023 – June 2024 • McDonalds.tech

- <u>Project</u>: Analysis of customer reviews with NLP
- Stack: Python, ruBERT, Yandex-GPT
 - o Automated suggestions for app improvement based on scrapped reviews from AppStore and PlayMarket.
 - o Preselected informative reviews for each function of app and aggregated them using Yandex-GPT.
- Project: Sales forecasting
- <u>Stack</u>: Python, PyTorch, SQL, CatBoost, SARIMA, Airflow, MLflow, Git, DVC
 - o Developed LSTM for univariate time series prediction to decrease retraining costs and improved WAPE by 6%.
 - o Modeled products similarity via graph architecture to predict sales of new products using GNN.
 - o Developed baseline model for predictions of unpopular products. Improved MAE by 4%.
 - Engineered features for boosting models to improve predictions of regular and promo sales.
- Project: Mentoring
 - o Mentored intern for 4 months until his promotion to Junior Data Scientist position.

Junior Machine Learning Researcher

Sep 2021 – Aug 2023 • Higher School of Economics University

- Project: Risk prediction for cardiovascular patients
- Stack: Python, Git, Bash, scikit-learn, imblearn, Optuna, MLxtend, CatBoost, Pandas, NumPy
 - o Conducted model interpretation, feature selection and importance analysis to ensure medical validity.
 - o Increased Recall by 9% by tuning models with respect to F₂ metric.

EDUCATION

PhD program in Machine Learning

Nov 2023 – Present • Higher School of Economics University

- <u>Project</u>: Parsing medical text records using NLP
 - o Parsing medical records to extract textual description of patient features for NLP analysis.
 - o Fine-tuned BERT-based encoder to classify patients with risk of disease progression.

Program: Neural networks in research

Sep 2022 – May 2023 • Lomonosov Moscow State University

- Scholarship: top-25 based on ML competition and academic results
- BSc & MSc in Fundamental and Applied Chemistry

Sep 2017 – Aug 2023 • Lomonosov Moscow State University

- GPA: 4.97/5, Red diploma
- Academic council Scholarship: top-10 MSU students for scientific achievements
- Published research <u>scholar.google.com</u>
